

NOPSEC UNIFIED VRM ROI

*The Return on Investment of an Effective
Vulnerability Management Program*

Achieving More with Less is Possible for a Modern RBVM Program

Most Security and IT leaders are being asked to achieve more business objectives with a relatively small security budget.

Solving vulnerability management challenges doesn't have to break your budget or require more staff. With the right program, you can achieve measurable results, productivity gains, and operational efficiency.

Unified VRM enables customers to save time and resources. Customers who implemented NopSec Unified VRM report measurable time and cost savings, improved operational efficiency in vulnerability prioritization and response, and reduced friction with security, infrastructure and appSec teams.

ROI THAT MATTERS

**25-50% LESS TIME
SPENT IN MANUAL DATA
TRIAGE**

**NOISE REDUCTION OF
40-80% POST
PRIORITIZATION**

**98% EFFICIENCY IN RISK
PRIORITIZATION
COMPARED TO CVSS**

**60-75% REDUCTION IN
MTTR METRICS**

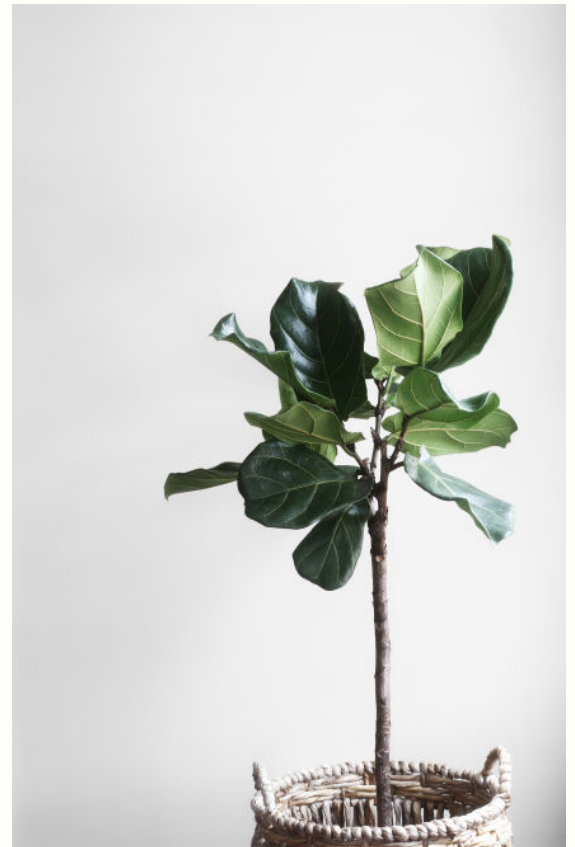

- 35-55% less time spent in threat intel research and vulnerability correlation
- Improved productivity via native integrations with customer's technology ecosystem
- 1-2 week(s) per month time savings in producing business-line reports/metrics to the remediation team and to the board/executives

RBVM Efficiency and Effectiveness Metrics

- 75-89% increased accuracy in asset prioritization
- Enhanced collaboration and communication between security and IT remediation teams
- 60-75% reduction in Mean-Time-to-Remediation
- 67% of customers improved their RBVM program Maturity Score from 2 to 4 within 6 months of product implementation

NopSec prioritizes the vulnerabilities that impact one's environment the most. We provide ML-based prioritization to enable data-driven conversations and collaboration among vulnerability management, IT and development teams.

NOPSEC UNIFIED VRM RBVM PROGRAM-AS-A-SERVICE

NopSec helps security professionals simplify their work, effectively manage and prioritize vulnerabilities, and make better informed decisions.

• www.nopsec.com

NopSec's Unified VRM is an innovative threat and vulnerability management solution that addresses the need for better prioritization and remediation of security vulnerabilities in a single platform.
