NOPSEC

Vulnerability Management at Scale with NopSec Unified VRM

Technology Designed for Enterprise Threat Exposures

The threat landscape changes rapidly — and your vulnerability management tools need to be just as flexible. NopSec Unified VRM:

- Operates on AWS RDS and Redshift for massive scalability.
- Incorporates a high-throughput API gateway for handling large volumes of requests.
- Runs data and processes through container clusters that load balance automatically (and are multi-regional as a fail-safe).

Additionally, NopSec can scale to incorporate multiple outside application security tool results to incorporate into your data within our platform.

Whether you have 13,000 assets under management, or 3 million, NopSec's architecture scales for your needs.

NopSec manages 10+ billion vulnerabilities and ingests from our 30 threat intelligence sources daily. With a redundant, load-balanced, and fully monitored backend, NopSec ensures consistent performance and availability, delivering 99.8% uptime outside of planned maintenance.

NopSec has scaled to meet the needs of a global organization whose environment includes:

- ✓ **450k** Employees Globally
- ✓ Footprints in **NA**, **MEA**, **APAC**
- ✓ Over **150** Countries
- ✓ **2M** in Assets

NopSec helps security professionals simplify their work, effectively manage and prioritize vulnerabilities, and make better informed decisions. NopSec's Unified VRM is an innovative threat and vulnerability management solution that addresses the need for better prioritization and remediation of security vulnerabilities in a single platform.
