NopSec Penetration Testing Services

Uncover the exploitable areas of risk in your infrastructure, applications, and employees.

An Outsider's Perspective of Your Environment's Vulnerability

Breaches are a costly and messy business. NopSec's team of ethical hackers delivers penetration testing services that enable you to identify where a cyber attacker may successfully target your business. Whether you want to target a specific web application, API endpoint, or test the entirety of your organization's attack surface across applications and networks, our team of subject matter experts has you covered. NopSec aligns testing methodologies closely with the OWASP Top 10 and MITRE ATT&CK framework to maximize coverage and deliver accurate, actionable results to help reduce your organization's cyber risk.

The Results

Our experienced team of white hat hackers delivers:

- **Your DREAD Score:** You will get thorough, deeply detailed test results that provide robust insight using the following factors:

  Damage + Reproducibility + Exploitability + Affected Users + Discoverability

- **An Executive Readout:** The higher-ups are getting involved, and they want to know the results? We're here to help. We'll go through the results of the test with you, line by line, and address any questions they may have. This saves you time and energy.

- **Remediation Assistance:** When our pentesters find issues in your environment, you can speak directly with the experts themselves and discuss actionable remediation steps to fix your environment.

- **Positive Control Validation:** It's easy to say, "you did x, y, and z wrong." We always go the extra mile and tell you what you also did right to prevent the hack.

- **Retesting:** When all is said and done, we offer a complimentary retesting of your environment to validate the fix is effective.

- **White Glove Service Approach:** Overall, we offer you a great experience with great results.

Assess where your security program stands in relation to potential threats and validate the effectiveness of your security controls with NopSec.

NopSec helps security professionals simplify their work, effectively manage and prioritize vulnerabilities, and make better informed decisions. NopSec's Unified VRM is an innovative threat and vulnerability management solution that addresses the need for better prioritization and remediation of security vulnerabilities in a single platform.
